Position available:  
Laboratory research assistant

Abate-Shen laboratory  
Columbia University Irving Medical Center  
New York, NY

The Abate-Shen laboratory, located at Columbia University Irving Medical Center, has a position open for an entry level research technician. The research assistant will provide basic research support to a molecular biology laboratory to assist in maintaining their mouse colony and assisting in performing preclinical studies on mouse models of cancer. Duties will include assisting lab members with preclinical studies as well as mouse husbandry and genotyping. S/he will conduct experiments according to written directions, assisting in collecting samples and preparing lab solutions and/or cultures, maintaining lab notebooks and records related to the work.

Requires a Bachelors degree in biology or equivalent with an emphasis in biochemistry or biology.

Prior experience in research laboratory is essential.

Experience in mouse husbandry and genotyping is strongly preferred.

Apply on talent links. Please make sure to include a cover letter and resume.
