- Johnson & Johnson is an Affirmative Action and Equal Opportunity Employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, gender, sexual orientation, gender identity, national origin, protected veteran status, or any other characteristic protected by law.
- Offered as a paid position, this Research Scientist role will join a thriving, collaborative, and dynamic research community at Janssen Biotherapeutics, one of the world’s industry leaders in Gene Therapy.

**Application Process**

- Please submit your resume, cover letter, and a brief statement of research interests to:

  Janssen Biotherapeutics, Inc.
  10100 Johnson Dr.
  Horsham, PA 19044

  Email: jobopenings@janssen.com

- Johnson & Johnson is an Equal Opportunity Employer. All qualified applicants will receive consideration for employment without regard to race, color, sex, religion, national origin, or any other characteristic protected by law. Applications from minority and women are encouraged.

**Research Opportunities**

- Janssen Biotherapeutics, Inc. is a leader in gene therapy and is committed to advancing the science of gene editing and delivery.
- We are seeking a Research Scientist to join our team focused on developing novel delivery platforms for gene therapies.

**Responsibilities**

- Conduct research aimed at developing novel delivery platforms for gene therapies.
- Collaborate with other scientists to design and implement experiments.
- Analyze and interpret experimental data to determine the effectiveness of delivery platforms.

**Qualifications**

- Ph.D. or equivalent degree in molecular biology, genetics, or related field.
- Experience in gene delivery, particularly with viral vectors.
- Strong background in molecular biology and cell biology.
- Proficiency in scientific writing and communication.
